

Hydrim C61 G4 Power Source Fan Removing & Reinstalling Part #01-113329S

Removing & Reinstalling the Power Source Fan

Remove top and back cover.

Disconnect wires 91 & 92 from the snap connection on the top wiring harness.

Remove 2 screws holding fan to top left upright at the back of the unit and remove fan.

To reinstall:

Put fan into position and replace 2 screws.

Reconnect wires to wiring harness.

Reinstall covers.
